

Cleanflo Announces New UL Listing UL508A Listed Panel Shop

Cleanflo Water Technologies (CFWT) of Craik, Saskatchewan proudly announces it is now a **UL Listed Industrial Control Panel Builder Shop (UL 508A)**. CFWT can fulfill all of your industrial automation requirements. As a business headquartered in Saskatchewan, you won't need to hire an out-of-province company to build, design, or integrate any of your industrial control equipment. Cleanflo will always strive to ensure our customers needs are satisfied.

Cleanflo has been in the rainwater harvesting and water treatment business for over 10-years. Our company has designed and built our own industrial control panels. CFWT would like to offer our expertise to the wider community. Cleanflo is an ambitious and driven team with experience in electrical systems, electronics, software design, programming, and industrial automation, in addition to water management solutions.
